

Gather

tutorials & guidelines

Welcome to Gather.Town

The Unplugged Gather.Town Metaverse is an open world, in which you can explore without constraint. You can interact with other participants when you are nearby them, discuss, meet with other participants and hang into our space. Within the Unplugged Metaverse, you can have access to 6 different maps accessible through a portal area available in each space. The different territories are identified by a specific artefact:

From left to right: onboarding area, peaceful island, strong community, crazy bayou, fantastic factory, social room, grocery store.

Within the Grocery Store, you can find all of our resources stored. The Social room can be used to meet, organise conference and discover our partners.

Ready, let's enter ...

log in

Gather is an open platform, no identification is required and no personal data is recorded. You can access the gather space dedicated to the unplugged quest through the following url: www.unplugged-metaverse.eu. It will connect you to the different gather maps.

When you first connect, you will be able to create your avatar and follow a quick tutorial on how to use gather.

The URLs that you will use to access the different worlds are persistent, so you can log in again whenever you want. When connecting back to the space, you will be located in the last area of the map where you were at your last visit.

To start back the map from the beginning, you can click on "respawn" in the menu.

If you want and decide to, you can also create an account. If you have an account, you can manage your default character in the Top Nav Menu of your Gather homepage and see all the maps you have been visiting stored in a unique place.

Welcome to Gather.Town

discover the space and interact

2

Our Unplugged Gather space is an open world, where you can explore without constraint. You can interact with other participants when you are nearby. From then on, you can interact with all the participants in the universe. To easily move on the map, use the directional arrows of your keyboard. You can also zoom out and in on the map. By double-clicking on a specific location on the map, your character will find the easy way to go there by her/his own.

If you walk up to an object and see it glow yellow, the object is interactive. A message displays next to the interactive object that reads "Press x to interact." (It may display more specific text, depending on the type of object and whether the object has a custom prompt message.) Just press the "x" key to engage with the object. You can close the interactive object by pressing the "x" key again or clicking the "x" at the top right of the window or iframe. As the Unplugged Metaverse is dedicated to presenting the game, the space is full of resources and tools that allow you to implement the proposed activities. In addition to glowing, the games are identified by artefacts in each universe that will allow you to interact with them, and don't forget, if you publish your work on our website, you can receive rewards! Here are the different artefacts:

From left to right: onboarding area, peaceful island, strong community, crazy bayou, fantastic factory

When you visit your maps, you might be alone, or you might cross other participants. To find someone on the Map, you can view the Participants list on the right side of your screen. Select a person's name, then choose Locate on Map or Follow. Locate on Map will display a dynamic line that will lead you to wherever the person is. Follow will automatically move you in the Space to the person and will attach you to them so they can lead you through the Space. You can also right click (or two-finger click) on anyone in the Space to open a context menu for that person. This menu lets you move to them, follow them, request to lead them, send them a message, or start a bubble. Messages will appear as private messages in the chat panel.

If you want to organise a meeting, a reunion or chat, you can also visit the social room, specifically made for this purpose. Here you will also be able to virtually meet with our partners and discover who we are!

ready? let's explore
